Recommended Extinguishing media		esistant fo se water je		cal powder, water spray.	
Special hazards arising from the substance or mixture	with temp	Hydrogen chloride and chlorine. Chlorine gas rate of decomposition increases with the concentration with temperatures above 85 °F (30 °C). Do not breathe mist / vapors / spray.			s with the concentration
Advice for fire- fightersWear positive pressure self-contained breathing ap Wear chemical protective clothing that is specifical little or no thermal protection. Structural firefighters' protective clothing provides effective in spill situations where direct contact with Non-combustible, substance itself does not burn b corrosive and/or toxic fumes. Some are oxidizers and may ignite combustibles (v Contact with metals may evolve flammable hydrog Containers may explode when heated. TOXIC; inhalation, ingestion or skin contact with m Avoid any skin contact. Contact with molten substa Effects of contact or inhalation may be delayed. Fire may produce irritating, corrosive and/or toxic g Runoff from fire control or dilution water may be compared.		is specifically recommended by the m g provides limited protection in fire situ contact with the substance is possible not burn but may decompose upon h nbustibles (wood, paper, oil, clothing, o able hydrogen gas. ntact with material may cause severe bu delayed. nd/or toxic gases.	uations ONLY; it is not e. leating to produce etc.). injury or death. rns to skin and eyes.		

6.	Accidental release me	asures
	Personal	ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area).
	precautions,	Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
	protective	Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and
	equipment and	wash thoroughly before reuse.
	emergency	Stop leak if you can do it without risk.
1	procedures	Prevent entry into waterways, sewers, basements or confined areas.
		Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers.
		Local authorities should be contacted if significant spill cannot be contained.
	Environmental	Do not allow spills to enter drains or watercourses.
	precautions	
	Methods and	Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is
	material for	possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product
	containment and	recovery, flush area with water.
	cleaning up	Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to
		remove residual contamination.
		Never return spills in original containers for re-use. For waste disposal, see Section 13 of the SDS.
1		· · · · · · · · · · · · · · · · · · ·

Handling and storage	
Precautions for safe handling	Wear appropriate personal protective equipment. Do not get in eyes, on skin, on clothing. Chemical attack increases with solution strength. Use with adequate ventilation. Observe good industrial hygiene practices. Do not apply heat or direct sunlight. Temperature and product concentration affect product quality and decomposition rates.
Conditions for safe storage, including any incompatibilities	Handle containers carefully to prevent damage and spillage. Keep container tightly closed. Store in a cool and well-ventilated place. Store in a corrosive resistant container. Consult container manufacturer for additional guidance. Store away from and do not mix with incompatible materials such as acids, ammonia, urea, oxidizers, organics and metals such as nickel, copper, tin, aluminum and iron.

## 8. Exposure controls and personal protection

7.

	Exposure Control parameters			
CAS No.	Ingestion	Source	Value	
1310-73-2	Sodium hydroxide	OSHA	TWA 2 mg/m3	
		ACGIH	Ceiling: 2 mg/m3	
		NIOSH	C 2 mg/m3	
7647-14-5	Sodium chloride	OSHA	No Established Limit	
		ACGIH	No Established Limit	
		NIOSH	No Established Limit	
7681-52-9	Sodium hypochlorite.	OSHA	No Established Limit	
		ACGIH	No Established Limit	
		NIOSH	No Established Limit	

## Individual protection measures, such as personal protective equipment

Use NIOSH/MSHA approved respirator, following manufacturer's recommendations when concentrations exceed permissible exposure limits.
Wear face shield with safety glasses with side shields and/or safety goggles.
Chemical resistant clothing such as coveralls/apron boots should be worn. Chemical Impervious gloves.
Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn. Eye wash and safety shower must be available when handling this product
Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

hysical and chemical properties	
Appearance	Clear, pale yellow, or greenish Liquid
Odor	Pungent, chlorine odor
Odor threshold	0.9 mg/m <sup>3</sup>
рН	12 - 13
Melting point / freezing point	7 °F (-13.9 °C)
Initial boiling point and boiling range	Decomposes above 230 °F (110 °C)
Flash Point	Nonflammable
Evaporation rate (Ether = 1)	Not Established
Flammability (solid, gas)	Not Applicable
Upper/lower flammability or explosive limits	Lower Explosive Limit: Not Measured
	Upper Explosive Limit: Not Measured
Vapor pressure (mmHg)	17.5 (@ 20 °C)
Vapor Density	Not Established
Specific Gravity	1.20 - 1.40
Solubility in Water	Complete
Partition coefficient n-octanol/water (Log Kow)	Not Measured
Auto-ignition temperature (°C)	Not Measured
Decomposition temperature	Not Measured
	Not Measured
Viscosity (cSt)	Not medsured
Viscosity (cSt) VOC %	Not Measured

## 10. Stability and reactivity

Stability and reactivity	
Reactivity: Hazardous Polymerization will not occur.	
Chemical stability:	Stable under normal circumstances.
Possibility of hazardous reactions:	No data available.
Conditions to avoid:	Contact with incompatible materials. Acid contact will produce chlorine gas.
Incompatible materials:	Any acidic material, ammonia, urea, oxidizers, organics and metals such as nickel, copper, tin, aluminum and iron.
Hazardous decomposition products:	No hazardous decomposition products are known.

## 11. Toxicological information Acute toxicity

Ingredient	Oral LD50, mg/kg	Skin LD50, mg/kg	Inhalation Vapor LC50, mg/L/4hr	Inhalation Dust/Mist LC50, mg/L/4hr	Inhalation Gas LC50, ppm
Sodium hypochlorite	5,000.00, Rat -	10,000.00, Rabbit -	10.50, Rat -	No data	No data available

(1310-73-2)	Category: NA	Category: 4	Category: NA	available	

ltem	Hazard
Acute Toxicity (mouth)	Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus and possibly the digestive tract.
Acute Toxicity (skin)	Harmful in contact with skin.
Acute Toxicity (inhalation)	Vapors and spray mist may irritate throat and respiratory system and cause coughing.
Skin corrosion/irritation	Causes severe skin burns and eye damage
Eye damage/irritation	Causes serious eye damage.
Sensitization (respiratory)	No data available.
Sensitization (skin)	No data available.
Germ toxicity	No data available.
Carcinogenicity	Not considered to be a carcinogen by IARC, ACGIH, NTP or OSHA.
Reproductive Toxicity	No data available.
Specific target organ systemic toxicity (single exposure)	May cause respiratory irritation.
Specific target organ systemic Toxicity (repeated exposure)	Not Applicable.
Aspiration hazard	Not classified; however droplets of product may be aspirated into lungs, through ingestion or vomiting and may cause serious chemical pneumonia.

12. Ecological information Toxicity: Very toxic to aquatic life. Toxic to aquatic life with long lasting effects.

Aquatic Ecotoxicity					
Ingredient	96 hr LC50 fish, mg/l	48 hr EC50 crustacea, mg/l	ErC50 algae, mg/l		
Sodium hypochlorite (7681-52-9)	0.08, Pimephales promelas	0.032, Daphnia magna	0.40 (72 hr),Dunaliella primolecta		
Sodium chloride (7647-14-5)	1,100.00, Freshwater Fish	3,310.00, Daphnia magna	Not Available		
Sodium hydroxide (1310-73-2)	196.00, Poecilia reticulata	40.38, Ceriodaphnia dubia	Not Available		

Persistence and degradability	There is no data available on the preparation itself.
Bioaccumulative potential Not Measured	
Mobility in soil	No data available.
Results of PBT and vPvB assessment This product contains no PBT/vPvB chemicals.	
Other adverse effects	No other effects are expected.

## 13. Disposal considerations

Waste treatment methods:	Do not allow into drains or water courses. Wastes and emptied containers should be disposed of in accordance with regulations made under the Control of Pollution Act and the Environmental Protection Act. Using information provided in this data sheet, advice should be obtained from the Waste Regulation Authority, whether the special waste regulations apply.		
Waste from material:	The waste determination should be made in discussion between the user and the waste disposal company.		
Container Management:	Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.
