## 4. First Aid Measures

<b>General</b>	Move victim to fresh air. Call 911 or emergency medical service. Give artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult. Remove and isolate contaminated clothing and shoes. In case of contact with substance, immediately flush skin or eyes with running water for at least 20 minutes. Keep victim warm and quiet. Effects of exposure (inhalation, ingestion or skin contact) to substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.
<b>Inhalation</b>	Move victim to fresh air. Call emergency medical care. Apply artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult.
<b>Eyes</b>	Irrigate copiously with clean fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses if present and easy to do - continue rinsing. Seek medical attention.
<b>Skin</b>	Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser. Get medical attention if irritation persists.
<b>Ingestion</b>	If accidentally swallowed obtain IMMEDIATE MEDICAL ATTENTION. Keep at rest. Rinse mouth. Do NOT induce vomiting.
<b>Most important symptoms and effects, both acute and delayed</b>	
<b>Overview</b>	Effects of exposure (inhalation, ingestion or skin contact) to substance may be delayed.
<b>Indication of immediate medical attention and special treatment needed</b>	Harmful if inhaled. May cause respiratory irritation. Causes serious eye damage. Causes severe skin burns and eye damage. Harmful if swallowed.

## 5. Fire-fighting measures

<b>Recommended Extinguishing media</b>	Regular dry chemical, carbon dioxide, fine water spray, regular foam.
<b>Unsuitable extinguishing media</b>	High volume water jet.
<b>Special hazards arising from the substance or mixture</b>	Thermal decomposition releases toxic and corrosive gas (Hydrogen chloride, Chlorine). Reacts with metal producing flammable/explosive hydrogen gas. Heating can cause expansion or decomposition leading to violent rupture of containers. Do not breathe mist / vapors / spray.

## 5. Fire-fighting measures (Cont.)

<b>Advice for fire-fighters</b>	<p>Wear positive pressure self-contained breathing apparatus (SCBA). Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection. Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible. Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes. Vapors may accumulate in confined areas (basement, tanks, hopper/tank cars etc.). Substance may react with water (some violently), releasing corrosive and/or toxic gases and runoff. Contact with metals may evolve flammable hydrogen gas. Containers may explode when heated or if contaminated with water. Reaction with water may generate much heat that will increase the concentration of fumes in the air. Fire will produce irritating, corrosive and/or toxic gases. Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution. Do not allow contaminated extinguishing water to enter the soil, groundwater or surface waters</p> <p><b>ERG Guide No. 157</b></p>

## 6. Accidental Release Measures

<b>Personal precautions, protective equipment and emergency procedures</b>	Evacuate all unprotected personnel and keep people away from and upwind of spill/leak. Put on protective equipment (see Section 8). Avoid direct contact with skin, eyes and clothing. Do not breathe vapor or fumes. Ensure adequate ventilation.
<b>Environmental precautions</b>	Do not allow spills to enter drains or watercourses.
<b>Methods and material for containment and cleaning up</b>	CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number in Section 1. Shut off the source of the leak if conditions are safe. Neutralize with lime or soda ash or absorb with dry earth, sand or other non-combustible material, and dispose waste appropriately. Wash area down with excess water to remove residual material.

## 7. Handling and storage

<b>Precautions for safe handling</b>	Use protective equipment. Provide adequate ventilation. Do NOT add water to acid. Do not breathe dust, vapor, mist, or gas. Do not get in eyes, on skin, or on clothing. Wash thoroughly after handling. Remove contaminated clothing and wash before reuse.
<b>Conditions for safe storage, including any incompatibilities</b>	Storage facilities must be properly designed and diked to contain any spillage. Store tightly closed in a dry, cool and well-ventilated place. Protect containers from heat, physical damage, ignition sources and incompatible materials.

## 8. Exposure controls and personal protection

### Exposure Control parameters

CAS No.	Material	Source	Value
7647-01-0	Hydrochloric acid	OSHA	Ceiling: 5 ppm (7 mg/m3)
		ACGIH	Ceiling: 2 ppm
		NIOSH	Ceiling: 5 ppm (7 mg/m3)

### Individual protection measures, such as personal protective equipment

<b>Respiratory</b>	Use NIOSH/MSHA approved respirator, following manufacturer's recommendations when concentrations exceed permissible exposure limits.
<b>Eyes</b>	Wear safety glasses with side shields to protect the eyes. An eye wash station is suggested as a good workplace practice.
<b>Skin</b>	Chemical resistant clothing such as coveralls/apron boots should be worn. Chemical impervious gloves. Emergency eyewash station should be in close proximity.
<b>Engineering Controls</b>	Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.
<b>Other Work Practices</b>	Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.
